Profile

Highly competent, motivated, and enthusiastic about my work with experience in working as part of a team fulfilling multiple roles and a passion to learn more. Possessing a proven ability to generate innovative ideas and solutions to problems. I am currently looking for a suitable position within web/software development.

Work Experience

Model Hobbies

Website Administrator

January 2018 - January 2022

Responsible for uploading new products to the company website and other platforms, calculating prices and writing descriptive summaries for each item, as well as designing and deploying promotional newsletters. During this time, I developed a keen interest in web development and used these skills to create an application to partially automate my work, allowing me to double my productivity. Skills used included JavaScript, React, Node, Express, CSS, HTML.

Model Hobbies

Warehouse Operative

November 2012 - December 2017

Main duties were checking and packing customer orders. I later assumed the role of processing the orders and printing the shipping labels. Due to my interest and experience with computers and programming I was eventually asked to assume the website administration role.

Skills

- Analytical thinking skills
